This list of abbreviations is particularly oriented toward the Shipboard Habitability Improvement Program. This index was compiled based on the historic MIL-STD-12 (which was canceled in 1998), and common usage on US Navy ship drawings. For purposes of the Shipboard Habitability Improvement Program this is the official list, and is intended to be complete. Where more than one translation is given, the reader must evaluate based on the context. If there are any questions or suggestions contact Habitability@MSCorp.net. For purposes of the Shipboard Habitability Improvement Program, this list supersedes ASME Y14.38. For most other purposes, ASME Y14.38 is the official source, if you happen to have a legitimate copy. This list may be helpful for Navy Ship Design Drawings in general. If the translation remains unclear, the reader should ask the originator of their document that is in question for the specific meaning of any abbreviation.
